S&G89000
Pick and Finishing Hammer
 Most popular body shop hammer. Designed to provide excellent balance for close-in work and finishing. Flat, round face, 1-1/4" diameter. Pencil point on 5-1/4" drop-forged steel body.

S&G89002
Hickory Hammer Handles with Wedge
 Fits all hammers with blue head.

S&G88150
Heel Dolly
 Popular for use in sharp corners and wide radii portions of panels and body. Made of drop-forged steel.

S&G88000
Universal (Railroad) Dolly
 Every body technician uses this dolly for bumping, straightening, dinging and finishing various portions of body, door panels and fenders. Good variety of curves and angles, with two beading and flanging lips. Made of drop-forged steel.

S&G88050
Toe Dolly
 This large drop-forged steel model remains popular with body technicians. It has flat and low crown areas and is used in dinging flat surfaces and lower portions of hood. Good for close work.

S&G88100
Wedge (Comma) Dolly
 A useful drop-forged steel dolly for work behind brackets, braces and other reinforcements on roof, body, fenders and panels. Advantageous in modern body design. Easy to hold in difficult areas.
